SMTA Announces Partnership with MentorNet

Minneapolis, MN—The Surface Mount Technology Association (SMTA) announced its recent partnership with MentorNet to help facilitate a growing demand for mentorship opportunities for its student members. The partnership allows members of the SMTA privileges to resources offered by MentorNet such as its one-on-one program, easy matching to SMTA members, and the résumé database for students.

The MentorNet E-Mentoring Program is designed to provide information, encouragement, and support to community college, undergraduate, and graduate students, postdocs, and untenured faculty. Protégés are matched in one-on-one e-mentoring relationships with mentors who have work experience, and MentorNet provides the training, coaching and support for them to pursue an 8-month mentoring relationship. Since 1998, MentorNet has matched more than 21,000 pairs of proteges and mentors with strong results.

For more information, visit www.mentornet.net, or contact Sis at 952-920-7682, sis@smta.org.

The SMTA is an international network of professionals who build skills, share practical experience and develop solutions in electronic assembly technologies, including microsystems, emerging technologies, and related business operations.
