

Mr. Allen Ouellette works as an engineer and business development manager at Vi TECHNOLOGY, a wholly owned subsidiary of Mycronic, INC. He

is responsible for the evaluation, implementation, and development of automated inspections solutions and supporting software tools for the North and South American markets. His unique contribution with experience in process engineering and control adds value and understanding beyond simple implementation.

Allen has a Bachelor of Science degree in Physics from the University of New Hampshire, as well as an MBA in Global Business from Southern New Hampshire University. He has been in the SMT industry since 1993, has worked for both contract and OEM manufacturers, as well as suppliers of inspection solutions. He also is a certified 6-Sigma Green Belt from the ASQ certification program, with years of experience to that end. Allen's focus has been to drive the development of technology to a real-life application of solutions for quality inspection equipment and software, to provide value to manufacturing lines throughout, and help companies lead the industry to the next phases of industry-leading standards.
