

Biography – Dr. Mark Currie

Mark works at Henkel Corporation, and is based in Irvine California as Global Business Director for Solder, and is responsible for their technical development direction across all focus market electronic assembly sectors - dealing with Global OEM's, Tier 1 and EMS accounts. Mark draws from his experience of having visited over 1000 customers, lived in 7 different countries, presented at many established international conferences since 1993, and authored over 100 papers. Mark graduated with both a Manufacturing Engineering degree and PhD from the University of Salford, UK. His undergraduate final year project introduced him to solder, which enticed him to follow with ESPRC industry funded Phd on the same subject matter. As such, Mark has been familiar with solder for 28years. In that period, Mark joined Multicore (soon thereafter to be Henkel) and has gone from Academia, to a Research Scientist, to a Process Engineer, and then onto Global Technical, Marketing, Product and Business development positions with Henkel.
