

Ram Wissel:

Ram received a Bachelor of Science degree in Chemical Engineering from the University of Arkansas. He began his career with KYZEN more than 20 years ago as an Applications Engineer in both laboratory and field support roles.

In his current role as Vice President, Global Technology, Ram is responsible for KYZEN's Applications Laboratories, Engineering and technical support around the globe.

Ram and his team are focused on continuing KYZEN's long standing commitment to efficient chemical usage and environmental stewardship by developing innovative new technologies to help customers operate more efficiently and reliability. He has a special interest in Industry 4.0 and providing process trending and analysis tools.

Ram has presented at numerous industry events and training seminars in Asia, Europe and the US.
